HOW TO USE THE TITAN

GET STARTED

1. Pull the entire glass chamber to remove it from the device.
2. Use a dab tool or Hot Knife to load extract into the center of the Hercules Atomizer.
3. Replace the mouthpiece chamber.

SETTING UP YOUR TITAN

Press the power button 5x to turn on and off.

Session Duration:

1. Use the right arrow to select Time on the menu and press the power button.
2. Use the arrow buttons to select how long you want each session to last. Press the power button again to return to the main menu.
3. The Titan will buzz once to let you know your timer is set.

Flex Temp:

1. Use the right arrow to select Temp on the menu and press the power button.
2. Use the arrow buttons to select your temperature. Press the power button again to return to the main menu.
3. The Titan will buzz once to let you know your temp is set.

How to Use:

1. Select Go from the main menu to start your session.
2. Watch the green circle around the temperature disappear. Once it's gone, the Titan will buzz once to let you know it's the correct temperature and you can take your first hit.
3. Titan will buzz once to let you know it's the correct temperature and you can take your first hit.
4. Use the airflow control vent directly under the glass chamber as your carb cap. Twist it to cut the airflow while the hit milks, and then release it all at once to create bigger clouds.
5. The white dotted circle around the timer will slowly disappear as your session winds down. Once the session is over, the Titan will stop heating.

CHARGING

Use the type-c charging cable with a wall outlet to charge your Titan.

- The Titan has pass-through charging, so you can use it while it's plugged in!

Charging Screen

WHILE CHARGING **ACTIVE SCREEN**

Temp Indicator:
The green circle will complete as the device heats to your chosen temp

Sesh Time:
The white dotted circle will disappear as your session counts down

- The Titan screen will turn off once it has been fully charged.
